

HIV PRE-EXPOSURE PROPHYLAXIS (PREP) AT A GLANCE: APRIL 2019

INTRODUCTION

The HIV PrEP At a Glance tool provides an overview of the coverage of key PrEP services in Massachusetts as of April 2019 in order to give health care providers quick access to basic coverage information to help inform discussions with patients about treatment. The tool provides a series of tables that outline coverage (and related costs and restrictions) for three categories of health insurance plans: (1) silver-level Qualified Health Plans (QHPs), (2) ConnectorCare plans, and (3) Medicaid (MassHealth) plans. The information in these tables is based upon publicly available information on the Massachusetts Health Connector website and individual insurer websites.

Please note that health insurance plans occasionally alter coverage, associated costs, or restrictions over the course of a plan year. Health care providers and plan members should therefore always confirm coverage by contacting the individual plan. To confirm the current coverage status of any service, providers and members can use the contact numbers provided under each table.

The United States Preventive Services Task Force (USPSTF) issued a *draft recommendation* regarding PrEP in November 2018. In the draft recommendation, USPSTF recommends offering PrEP to persons who are at high risk of HIV infection and concludes with high certainty that there is a substantial net benefit from the use of PrEP in persons at high risk for HIV infection and provided an “A” rating for this recommendation.¹ As of April 2019, the recommendation has not been finalized; however, an “A” rating will require many health plans to cover PrEP without cost-sharing.

Did you know? Patients who are on another person’s health insurance plan (such as that of their parent, spouse, or partner) may be able to request that they receive an insurance company’s summary of payment form directly, rather than having it sent to the insurance policy holder. In addition, health insurance plans may not identify or describe PrEP-related and other “sensitive health care services” in a summary of payment. More information is available at <https://www.hcfama.org/confidentiality>.

MASSACHUSETTS SILVER-LEVEL QUALIFIED HEALTH PLANS

The table below summarizes coverage of PrEP services in the silver-level Qualified Health Plans (QHPs) available to individuals via the Massachusetts health insurance marketplace (Massachusetts Health Connector). The silver-level QHPs were chosen for inclusion in this resource because they are generally representative of coverage and are often the most cost-effective choice for low-income consumers. More information on these plans is available on the Massachusetts Health Connector website: <https://mahealthconnector.optum.com/individual/>.

Abbreviations: **Cost** = Patient Cost-Sharing; **Labs** = Diagnostic Test (X-Ray, blood work); **PCP** = Primary Care Provider; **Util. Mgmt.** = Utilization Management Requirements; **QL** = Quantity Limit; **PA** = Prior Authorization; **ST** = Step Therapy

CONNECTORCARE PLANS

The table below summarizes coverage of PrEP services in the Massachusetts ConnectorCare plans. ConnectorCare plans are low-cost plans available to individuals with household incomes up to 300% of federal poverty level. In general, there are three levels of ConnectorCare plans, with standardized cost-sharing on each level. More information on these plans is available on the Massachusetts Health Connector website: <https://mahealthconnector.optum.com/individual/>.
