

## HEPATITIS C TREATMENT AT A GLANCE: MARCH 2019

### INTRODUCTION

The Hepatitis C (HCV) Treatment At a Glance tool provides an overview of the coverage of key HCV services in Massachusetts as of March 2019 in order to give health care providers quick access to basic coverage information to help inform discussions with patients about treatment. The tool provides a series of tables that outline coverage (and related costs and restrictions) for three categories of health insurance plans: (1) silver-level Qualified Health Plans (QHPs), (2) ConnectorCare plans, and (3) Medicaid (MassHealth) plans. The information in these tables is based upon publicly available information on the Massachusetts Health Connector website and individual insurer websites.

Please note that health insurance plans occasionally alter coverage, associated costs, or restrictions over the course of a plan year. Health care providers and plan members should therefore always confirm coverage by contacting the individual plan. To confirm the current coverage status of any service, providers and members can use the contact numbers provided under each table.

The landscape of treatment for HCV has evolved considerably with the introduction of direct-acting antivirals (DAAs) in 2013. Treatment with DAAs cure over 95% of patients and can be completed in as little as 8 weeks.<sup>1</sup> The American Association for the Study of Liver Diseases and the Infectious Diseases Society of America's (AASLD/IDSA) guidance, *Recommendations for Testing, Managing, and Treating Hepatitis C*, recommends treatment with DAAs for virtually all individuals with chronic HCV infection.<sup>2</sup>

**Abbreviations:** Cost = Patient Cost-Sharing; Labs = Diagnostic Test (X-Ray, blood work); PCP = Primary Care Provider; Util. Mgmt. = Utilization Management Requirements; QL = Quantity Limit; PA = Prior Authorization; ST = Step Therapy

## CONNECTORCARE PLANS

The table below summarizes coverage of HCV services in the Massachusetts ConnectorCare plans. ConnectorCare plans are low-cost plans available to individuals with household incomes up to 300% of federal poverty level. In general, there are three levels of ConnectorCare plans, with standardized cost-sharing on each level. More information on these plans is available on the Massachusetts Health Connector website: <https://mahealthconnector.optum.com/individual/>.

Please note that prior authorization requirements vary across plans. Insurers are increasingly providing unrestricted access to HCV treatment in accordance with best practices. If you experience treatment denials based on such criteria as minimum fibrosis severity, substance use, and/or prescriber specialty, please contact Phil Waters at the Center for Health Law and Policy Innovation of Harvard Law School: [pwaters@law.harvard.edu](mailto:pwaters@law.harvard.edu).

Plan Name	Cost of Services		Eplusa (sofosbuvir / velpatasvir)			Harvoni (ledipasvir / sofosbuvir)			Mavyret (glecaprevir / pibrentasvir)			Sovaldi (sofosbuvir)			Vosevi (sofosbuvir / velpatasvir / voxilaprevir)			Zepatier (elbasvir / grazoprevir)

## MASSHEALTH PLANS

The table below summarizes coverage of HCV services in MassHealth, Massachusetts’s Medicaid program.<sup>3</sup> MassHealth offers a variety of coverage options, depending upon applicant eligibility. Coverage may be provided directly by MassHealth, through the MassHealth Primary Care Clinician Plan (PCCP), or by an Accountable Care Organization (ACO) or a Managed Care Organization (MCO) contracting with MassHealth.

**As of August 1, 2016, all MassHealth beneficiaries have a right to access HCV direct-acting antivirals without restrictions related to fibrosis score, substance use abstinence, or prescriber specialty.<sup>4</sup> If you experience treatment denials based on these criteria, please contact Phil Waters at the Center for Health Law and Policy Innovation of Harvard Law School: [pwaters@law.harvard.edu](mailto:pwaters@law.harvard.edu).**
